

Introduction

- As we all are very well aware of this growing world, each country, including individual these days are trying there best to get better but with all these new, quick techniques that we use daily to ease our work and also to cut the time are directly and indirectly harming environment. **Air, water, land no component of the earth is left untouched.**
- Should we stop using these products that causes environmental harm? Is it really possible? The answer to this is “NO”, it is not practical but there are ways to help reduce the harmful effects using the **eco friendly app** that guides and gives information of how certain things can be used and recycled.

Green Choice Application

Green Choice is a carbon-neutral online marketplace that makes it easy to buy the best products for you and the planet.

Galen Ka1rlan-Mason is the founder of this application. He wanted to ensure Green Choice would always operate in the best interest of all life and Mother Earth.

Green Choice Application working to achieve this by:

- a) Empowering consumers to make informed choices
- b) Conducting operations with integrity and transparency
- c) Fostering a work environment of integrity, courage, curiosity, and collaboration

Why should we trust Green Choice?

The following are reasons why we can trust on Green Choice.

- a) Its not making things up! Its rely on data from existing authorities in personal and public health, environmental science, human rights, sustainable agriculture, and beyond. For more info on our data sources check out our GS System page.

b) It will always be honest with you about how we evaluate companies and their products, and it will always be honest with you about how we make money and who pays us.

c) Green Choice is completely free to use!

Carma Carpooling Application

Carma's flagship product is a carpooling app that matches drivers and riders, enabling people to make car transportation more efficient and affordable. The company states on its website that Carma's mission is "to enable people around the world to break free from the tyranny of the modern commute

We all know that transportation is one of the biggest CO2 emitters in the world. By driving alone to work every day, you create huge amounts of CO2 and leave a negative impact on the air and the environment.

Carma Carpooling is the app that helps you connect with the people from your area traveling to the same destination as you.

Here's how it works:

- you get in touch with other carpoolers
- you split the cost of transportation
- you all drive together

Conclusion: Carma is a platform and mobile app that allows users to identify local commuters with whom they can share rides. It's hardly a novel concept, but Carma wants to differentiate itself from a new breed of "ride-sharing" firms that allow customers to find rides on demand. passengers in such a way that they can share the cost of a ride.

Good Guide Application

Good Guide is an app that will help you learn which products are ethical, green, and safe to use, and which ones are not. The app is based on scientific research and covers everything from:

- personal care products
- household products
- babies & kid's products
- It's available for Android and iOS.

Through its website, online toolbar and smartphone application, Good Guide provided tools for consumers to make purchasing decisions on the basis of the health, environmental and social impact of a product's life cycle. These products are designed to provide consumers with this information right at the point of sale, to help them to apply their values to their purchases.

For each listed product the site generates three ratings: a health rating, an environmental rating, and a social rating. Good Guide databases include the energy and resource consumed plus the pollution produced in manufacturing the product, the nutritional value of foods, the agricultural and animal husbandry practices, and the corporate sponsorship of social and political philanthropy.

The Irecycle App

IRecycle app is U.S. based app whose mission is to increase U.S. recycling rates by helping the user to sort and bin recyclables successfully. It allows you to browse for the materials that the user wants to find the recyclers who will take it besides it will also tell you if you can drop in the blue bin or not. It provide users with locations, telephone, and website connections to more than 110000 recycling programs at 250000+ locations in united states. Also, this app gives you the local locations for the stuff you didnt even know could be recycled.

According to the users: one of the feature that is loved by them is that they can click on the number or address to call or get directions using their preferred apps.

#let us talk you through the services

*The **Calendar function** provides residents with simple to read, month to view, a calendar showing the required bins to be picked up identified according to the street address.

*Days are labeled with coloured bars identifying the bins to be placed on the kerb and if there are any special events (Ex. Bulky Waste pick up)

*The **informative feature** Gives important information to help residents to identify where they can upgrade in recycling materials.

***Push notification** gets activated by simply enabling push notifications and the App will instantly notify residents of any changes to their regular pick-up.

*The **Forms tab** allows residents to give in a bin request for citizen and commercial premises.

*The **Bin Info tab** grants the locals helpful information as to what is to be disposed of in the numerous bins provided to the residents and how often this litter is collected.

*The iRecycle app allows the inhabitant the power to Add **Reminders**. As everyone these days living a very busy life therefore, this easy-to-use little characteristic takes the tension out of recalling what day is bin day and which bins are left for collection.

Ecosia App

Ecosia app is built on the concept of Mozilla FireFox or say is based on it. Using it means planting trees through Ecosia's browser.

ecosia app founder and those who run it or those who see it maintenance says that like other search engines, **they produce money through ads**, but they use entire 100% of their yield for the heavenly body. As per the records this community has already planted 150 million trees in over 35 countries.

#Advantages of downloading this app:

***Ad blocker and fast browsing** — The Ecosia app is based on Mozilla's Firefox and gives you an instinctive, quick and firm browsing encounter with whatever you need, including tabs, incognito mode, downloads, dark mode and bookmarks.

***Set out trees with your searches and be climate and weather operative day-to-day** — The Ecosia body is tackling climate change, safeguarding wildlife, and collaborating with local communities around the globe, sowing the correct trees and plants in the right places.

-**Preserve your privacy** — They doesn't create a figure or a profile of the user or track their location, never vend any statistics to advertisers, and the searches are always SSL-encrypted. they quouted- We want trees, not your data.

-**Carbon negative browser** — Not only do the trees, plant absorb CO₂, and henceforth they also have their own solar plants. They don't just generate enough renewable energy to power all your hunt, but twice as much! This means more renewables (and lesser fossil fuels) in the electricity lattice.

Downloading Ecosia app is absolutely free. users can pick from seven different languages.

Joule Bug App

JouleBug is the easy way to make your everyday habits more sustainable, at home, work, and play. Discover how you and your friends can use resources, without using them up, with this newly designed app.

#Few Features:

***EARN ACHIEVEMENTS**

there are various awards with level up awards that are provided to the user when the given task is done.

- Master Actions.

- Earn extra achievements called Badges

***BE SOCIAL**

- this is the section to which everyone is aware of connecting, linking, sharing photos, videos, influencing, knowing new things, different ways.
- Join local Communities to see what's happening near you
- Like and Comment on others' stories

***TRACK YOUR PROGRESS**

- Fill up your Trophy

#these two are the feedbacks of two different users:

- The first one says that this app is effective as it can help you save a lot of water or energy and minimise waste.
- The other one states that this platform Constantly encourages you to make positive changes! If you are prepared to go out and help the nature, then this is the app for you.The Truth is... Being eco-friendly isn't always easy and fun, but this app has all that it takes to start you off if you're willing to make a change!

Conclusion

- As presented these eco friendly apps are very effective in disposing waste or once used products. Alike these apps there are other apps as well, few feature might be similar but not every.
- Since we have got ways to atleast control the pollution and overuse of the resources and hence help in keeping our environment clean, healthy then why not ??
- Given below are the other eco friendly apps.
 - water print app
 - save heat easy app
